Sweet Tasting

NET 1 FL. OZ. (30ml)

Just like people,

pets can show allergic symptoms when their immune systems begin to recognize certain everyday substances - or allergens - as dangerous. Even though these allergens are common and harmless to most, a pet with allergies will have an extreme reaction to them.

Common symptoms include:

- sneezing
- itchy skin
- increased scratching
- itchy runny eyes
- itchy ears
- vomiting
- diarrhea
- paw chewing
- swollen paws
- snoring caused by an inflamed throat

Allergena for Pets is formulated to provide relief from the following allergens:

Trees

Birch, White
Cedar, Mountain
Oak, Red

Weeds

Mugwort
Pigweed
Ragweed, Short
Thistle, Russian

Grasses

Bahia
Bermuda
Bluegrass
Rye
Timothy

House Dust Mites

D. Pteronyssinus
(Common in hot humid climates)
D. Farinae
(Common in dry climates)

Herbal Drainage Remedies:

- Baptisia tinctoria
- Hydrastis canadensis
- Myrrha
- Nasturtium aquaticum
- Phytolacca decandra

Frequently Asked Questions

How does Allergena for Pets work?

Allergena is a Homeopathic Immunotherapy that reduces your pet's negative reaction to allergens. Allergena homeopathic allergy drops build immunity by giving micro doses of what your pet is allergic to so their body becomes safely conditioned to tolerate those allergens and reduce allergic symptoms.

- Immunotherapy: Treatment to stimulate or restore the ability of the immune (defense) system to fight infection and disease. Allergy shots are another form of Immunotherapy.

Why are drainage remedies included?

Drainage remedies assist your animal's body in opening up drainage routes to allow the discharge of toxic substances which may have accumulated.

Why are skin remedies included?

Skin remedies relieve burning, itching, swelling and help to promote healthy skin.

How long before Allergena begins "working"?

Some pets experience relief within hours. Others realize a reduction of symptoms between one to eight weeks.

How long should my pet continue to take Allergena?

Frequent administration of Allergena is essential to building immunity. Recommended dosage for animals (1-20 lbs) is 4-6 drops three times daily. (21-60 lbs) 8-10 drops three times daily and (61 lbs & above) 10-15 drops three times daily. Severe and long term allergy sufferers should begin Allergena one to two weeks before the allergy season.

Are there any side effects?

There are no known side effects. For extreme sufferers, heightened allergic reaction may occur following administration of Allergena. Do not be alarmed at this response.

Can my pet take Allergena with other medications?

Yes. There are no known adverse drug interactions.
