- No GMOs and No Gluten
- Alleviates runny nose, sneezing, congestion, sinus pressure, itchy & watery eyes
- Contains herbal drainage remedies to enhance the drainage process and remove antigen residue
- Additional immune support provided from Echinacea

**Animal Dander is everywhere.**

*Pet dander gets everywhere, including places where they have never set a paw.*

- According to the National Institutes of Health, detectable levels of pet dander are in every home in the U.S.
- It's not the hair or fur that's the real problem. Instead, people are usually allergic to the dander -- flakes of dead skin -- as well as the saliva and urine.
- Some people with pet allergies also have skin reactions. For instance, their skin might break out where a dog or cat licks them. Others with more severe allergies might develop hives on their face or chest.
- About 10% of the U.S. population has pet allergies, and cats are among the most common culprits. Cat allergies are twice as common as dog allergies.
- About 20% to 30% of people with allergic asthma have severe flare-ups after coming in contact with a cat.

**Extracts of Animal Allergens Include:**

**Cat & Dog** plus: Horse, Cattle, Mouse, Rat, Hamster, Gerbil, Guinea Pig, Rabbit, Hog, Chicken, Duck & Goose

#### **Herbal Drainage Remedies:**

- **Baptisia tinctoria**
- **Hydrastis canadensis**
- **Myrrha**

## Frequently Asked Questions

### How does Allergena Pet Dander work?

The immune system defends us against disease. When harmful substances are detected, such as animal dander, the immune system creates antibodies, which destroy or neutralize allergens (i.e. mold, animal dander and/or pollens) that cause us to have allergic reactions. However, sometimes even our immune system is not strong enough to defend against these allergens. Allergena is a Homeopathic Sublingual Immunotherapy that reduces the body's negative reaction to allergens. Our homeopathic allergy drops build immunity by exposing your body in micro doses to whatever it is that you are allergic to. This way, the body becomes safely conditioned to tolerate the allergens that previously brought on allergic reactions, and ultimately reduce allergic symptoms. Below are a few definitions to give you a better idea of how Allergena works:

- Sublingual: Underneath the tongue.
- Immunotherapy: Treatment to stimulate or restore the ability of the immune (defense) system to fight infection and disease. Allergy shots are another form of Immunotherapy.

### Why are drainage remedies included?

Our specific herbal remedies enhance drainage of foreign particles which accumulate in the lymph system.

### How long before Allergena begins “working”?

Some users experience relief within hours. Others realize a reduction of symptoms between one to eight weeks.

### How long should I continue to take Allergena?

Frequent administration of Allergena is essential to building immunity. Recommended dosage for adults is 10-15 drops under the tongue, 3 times daily, and for children, 6 drops under the tongue, 3 times daily, before or after meals. Allow drops to be absorbed orally, then swallow. During an acute allergy attack, administer 5-8 drops per hour, in addition to 3 times daily.

### Are there any side effects?

There are no known side effects. For extreme sufferers, heightened allergic reaction may occur following administration of Allergena. Do not be alarmed at this response. If you experience a headache after taking Allergena, decrease dose to a tolerable level. Then increase dose slowly over a period of two weeks.

### Can I take Allergena with other medications?

Yes. There are no known adverse drug interactions.

### What is Sublingual Immunotherapy (SLIT)?

Sublingual Immunotherapy is a method of allergy treatment that uses an allergen solution given under the tongue. Over time, sensitivity to allergens are reduced. In 1998 the World Health Organization concluded that Sublingual Immunotherapy was a viable alternative to the injection route and that its use in clinical practice is justified.

Bousquet J, Lockey R, Malling H (1998). "Allergen immunotherapy: therapeutic vaccines for allergic diseases. A WHO position paper". J Allergy Clin Immunol 102 (4 Pt 1): 558–62.
