

ALLERGENA™

Zone 1 Kids

CT, DE, MA, MD, ME, NH,
NJ, NY, PA, RI, VT, WV & DC

Allergy Relief for Where You Live*

Geographically Zoned Formula For Local Tree, Weed & Grass Allergens

- Homeopathic Sublingual Immunotherapy
- Builds a strong immune system to help fight allergies*
- Non-Drowsy, no side effects and no drug interactions*
- No GMOs and No Gluten
- Alleviates runny nose, sneezing, congestion, sinus pressure, itchy & watery eyes*
- Contains herbal drainage remedies to enhance the drainage process and remove antigen residue*
- Additional immune support provided from Echinacea*
- Sweet Taste! Vegetable Glycerin Base

Alcohol Free
Glycerin Base

NET 1 FL. OZ. (30ml)

Zone 1 Kids is formulated to provide relief for the following local allergens:**

Trees

Alder, Smooth
Arbor Vitae
Ash, Arizona
Ash, Green
Ash, White
Aspen, Quaking
Beech, American
Birch, Paper
Birch, River

Hickory, White
Hornbeam
Ironwood
Ligustrum

Maple, Hard
Maple, Red
Maple, Silver
Mulberry, Paper
Mulberry, Red
Mulberry, White
Oak, Black
Oak, Pin
Oak, Post
Oak, Red
Oak, White
Oak, Willow
Pine, Austrian
Pine, Red
Pine, Scotch
Pine, Shortleaf
Pine, White
Poplar, Lombardy
Poplar, White
Privet
Spruce, Blue
Sweetgum
Sycamore
Tree-Of-Heaven
Walnut, Black
Willow, Black

Weeds

Carelessweed
Cocklebur
Dock, Bitter
Dock, Sour
Dock, Tall
Dock, White
Dock, Yellow
Goldenrod
Jerusalem Oak
Lamb's Quarters

**DISCLAIMER: Local allergens listed are immunologically reactive with the standard homeopathic antigen formulation used in this and other Allergena products.

Frequently Asked Questions

How does Allergena Zone 1 Kids work?

The immune system defends us against disease. When harmful substances are detected, such as pollens, the immune system creates antibodies, which destroy or neutralize allergens (i.e. pollens, dust and/or mold) that cause us to have allergic reactions. However, sometimes even our immune system is not strong enough to defend against these allergens. Allergena is a Homeopathic Sublingual Immunotherapy that reduces the body's negative reaction to allergens. Our homeopathic allergy drops build immunity by exposing your body in micro doses to whatever it is that you are allergic to. This way, the body becomes safely conditioned to tolerate the allergens that previously brought on allergic reactions, and ultimately reduce allergic symptoms. Below are a few definitions to give you a better idea of how Allergena works:

- Sublingual: Underneath the tongue.
- Immunotherapy: Treatment to stimulate or restore the ability of the immune (defense) system to fight infection and disease. Allergy shots are another form of Immunotherapy.

What does "Geographically Zoned" mean?

Trees in the Southwest are different from trees on the East Coast. That's why native trees, weeds and grasses from across the US have been grouped into 9 unique "zones". These zones ensure your body builds immunity to the specific allergens that make you miserable.

Why are drainage remedies included?

Our specific herbal remedies enhance drainage of foreign particles which accumulate in the lymph system.

How long before Allergena begins "working"?

Some users experience relief within hours. Others realize a reduction of symptoms between one to eight weeks.

How long should I continue to take Allergena?

Frequent administration of Allergena is essential to building immunity. Recommended dosage for adults is 10-15 drops under the tongue, 3 times daily. Recommended dosage for children (age 2-12), 6-10 drops under the tongue, 3 times daily, before or after meals. Infants (age 0-2), 3-5 drops 3 times daily, before or after meals. If possible, allow drops to be absorbed orally, then swallow. **Acute allergy attack:** Administer half the recommended dosage of drops per hour, in addition to 3 times daily.

Severe and long-term allergy sufferers?

Pre-Season: Begin Allergena one to two weeks before the allergy season at half the recommended dosage, 3 times daily. **During Allergy Season:** Increase to your recommended dosage. **Post-Season:** For best results, reduce your recommended dosage to half, once daily for the two weeks following the allergy season.

Are there any side effects?

There are no known side effects. For extreme sufferers, heightened allergic reaction may occur following administration of Allergena. Do not be alarmed at this response. If you experience a headache after taking Allergena decrease dose to a tolerable level. Then increase dose slowly over a period of two weeks.

Can I take Allergena with other medications?

Yes. There are no known adverse drug interactions.

What is Sublingual Immunotherapy (SLIT)?

Sublingual Immunotherapy is a method of allergy treatment that uses an allergen solution given under the tongue. Over time, sensitivity to allergens are reduced. In 1998 the World Health Organization concluded that Sublingual Immunotherapy was a viable alternative to the injection route and that its use in clinical practice is justified.

Bousquet J, Lockey R, Malling H (1998). "Allergen immunotherapy: therapeutic vaccines for allergic diseases. A WHO position paper". J Allergy Clin Immunol 102 (4 Pt 1): 558-62.
