

PRODUCT INFORMATION

Eye Plus

A Potent Blend of Antioxidants and Photoprotective Nutrients for Optimal Vision Support*

Promotes Healthy Structure and Function of the Eye*

Lutein and zeaxanthin are carotenoids found throughout the retina but are highly concentrated in the center of the macular region. The macula is responsible for central vision.

Vitamin C is widely distributed in the aqueous compartments of the cells throughout the retina. Vitamin E is an important component of the photoreceptor outer segment membranes.

Bilberry extracts promote healthy connective tissue integrity, primarily in blood vessels and the eye. Bilberry anthocyanins (potent antioxidants) have demonstrated an affinity for the pigmented epithelium of the retina and hasten the regeneration of rhodopsin.

Supplement Facts		
Serving Size: One (1) capsule		
Each Capsule Contains:	% DV	
Vitamin C (as Ascorbic Acid)	100 mg	167%
Vitamin E (as D Alpha Tocopheryl Succinate)	30 IU	100%
